3) In	formation Disclosure Statement(s) (PTO-1449) Paper No(s).	6) Other:

1. Newly submitted claims 21,22 (and claim 20 wherein the elected species has been deleted and replaced with FITC) are directed to a species that is distinct from the invention originally claimed for the following reasons. FITC is functionally and chemically distinct from the elected species (eg. alpha galactosyl antigen).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 20-22 are withdrawn from consideration as being directed to a non-elected species. See 37 CFR 1.142(b) and MPEP § 821.

2. Claims 14-17,19 are under consideration.

RESPONSE TO APPLICANTS ARGUMENTS

- 3. Regarding priority for the claimed invention and the application of prior art, the claimed invention using folate is not disclosed in the parent applications to which priority is claimed and therefore the priority date for application of prior art is the filing date of the instant application.
- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 14-17,19 stand rejected under 35 U.S.C. 102(e) as being anticipated by

Kranz et al.(US Patent 5,547,668) as evidenced by Borrebaeck et al. for the reasons elaborated in the previous Office Action. Applicants arguments have been considered and deemed not persuasive.

Kranz et al. teach therapeutic conjugates containing folate covalently joined to a murine antibody (see column 4, third paragraph and column 7). Borrebaeck et al. disclose that the art recognized that murine antibodies contain alpha Gal which is bound by human anti alpha Gal antibodies(see page 477, second column). Thus, it is an inherent property of the conjugates taught by Kranz et al. that they contain the alpha Gal/ alpha galactosyl epitope. The conjugates are "cytomodulating" to the extent that they are not cytotoxic in the absence of exogenous effector mechanisms.

Regarding applicants arguments and the terms "consisting essentially of", the MPEP section 2111.03 (Rev. 1, Feb 2003) discloses:

For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, "consisting essentially of" will be construed as equivalent to "comprising." See, e.g., PPG, 156 F.3d at 1355, 48 USPQ2d at 1355 ("PPG could have defined the scope of the phrase consisting essentially of' for purposes of its patent by making clear in its specification what it regarded as constituting a material change in the basic and novel characteristics of the invention."). See also In re Janakirama-Rao, 317 F.2d 951, 954, 137 USPQ 893, 895-96 (CCPA 1963).

In the instant application, there is no definition of the term "consisting essentially of" in the context of the claimed invention and therefore the term will be treated as open language (eg. of the scope of comprising). Furthermore, even if the claims recited "consisting", the specification defines "alpha gal epitope" (A.K.A. alpha gal) as "any compound that binds to an antibody specific for alpha galactosyl" (A.K.A. alpha gal, see page 8, last paragraph). Borrebaeck et al. disclose that the art recognized that murine antibodies contain alpha Gal which is bound by human anti alpha Gal antibodies (see page 477, second column). Therefore, the murine antibody portion of the conjugate taught by Kranz et al. constitutes "alpha gal" as per the definition of said term in the specification and the instant claims read on murine antibody as the "alpha gal" component.

- No claim is allowed.
- 7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

- 8. Papers related to this application may be submitted to Group 1600 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Papers should be faxed to Group 1600 at (703) 308-4242.
- 9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Ron Schwadron whose telephone number is (703) 308-4680. The examiner can normally be reached Monday through Thursday from 7:30 to 6:00. A message may be left on the examiners voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Group 1600 receptionist whose telephone number is (703) 308-0196.
